

Creating “Clay on Campus” Flyers & More!

DO'S AND DON'TS

Logo

The Clay logo must be against a background with high contrast—either significantly lighter or darker than the colors in the arch.

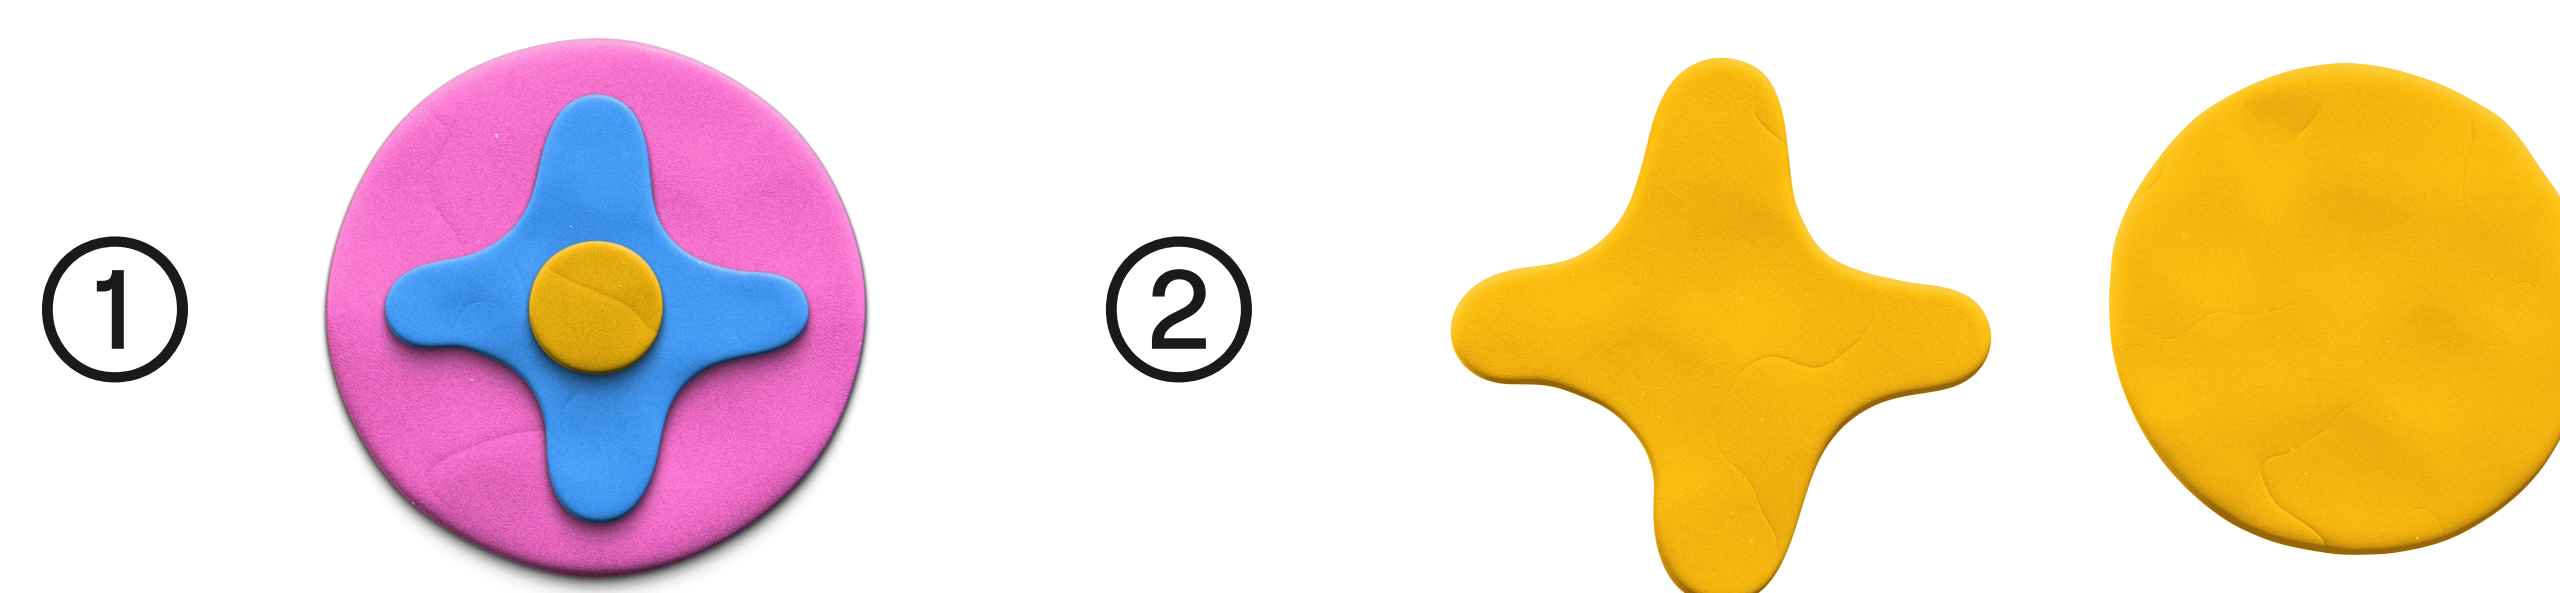

Fonts

If you're designing in Canva or other platforms use either ① Poppins or ② Inter for the flyers—no other decorative fonts can be used—feel free to use different weights or styles (bold, medium, italic, etc) but do NOT use any other fonts.

Images + Badge

Do not use any stock images or internet images. The tile/badge can be used to represent the club or as a graphic for posters, socials, etc. The assets folder has a ① stacked badge and ② individual tiles. These can be used as needed, only rule: do NOT rotate the tiles and do NOT stack them, it just breaks the shadows and we don't want that, but you can play with their scale.

Colors

Try and stick to these colors! But maybe don't use all of them at once—stick to 2-3 colors at a time, black and white can be used too!
